

Best Western Resort Country Club *going the Green way !*

With a view to make the world a better place to live, it's important to implement green practices to reduce waste, preserve natural resources, improve both air & water quality, & protect eco-systems & bio-diversity. To achieve the objective, we have initiated the following steps at the resort :

- All bulbs & tubes have been replaced with LEDs.
- Solar Panels installed for heating water to supply hot water to all rooms & public areas. All geysers removed.
- Plastic, paper & other waste materials are collected by a *Kabadi*, for sale to recycling industries.
- Bio-degradable garbage bags are used for collection of garbage.
- Signages put prominently requesting guests not to litter on lawns & to use dustbins installed.
- A large Sewage Treatment Plant (STP) & an Effluent Treatment Plant (ETP) have been installed for recycling of the w/c, laundry & kitchen effluents, & after treatment the same are used for garden watering & manuring.
- No stubble burning. Garden & horticulture waste is recycled to make bio-mass pellets, which are used in kitchen stoves & boiler, to replace LPG & firewood.

- Restaurant food waste is taken away by a Piggery farmer.

We are wasting 30% to 40% of the food in this world, whilst millions of people go to bed hungry.

- In bath rooms, water shower heads have replaced most of bath tubs, to conserve water.
- Swimming pools water is recycled after filtration.

- E-golf carts provided for shuttling guests & transportation of guests' baggage in the resort area.
- We have planted more than 10,000 trees & shrubs, on 50 acres of the resort area, during the last about 25 years.
- Water sprinklers are used for watering of lawns & garden, to conserve water.
- Display plates, as depicted below, are prominently placed in all wash rooms, to educate guests to preserve environment.

HELP US, HELP EARTH

<p>You could ask for a fresh change of towels</p>	<p>You Save energy water & detergent</p>	<p>You could reuse a sparingly used towel by hanging it to dry</p>	<p>You Save upto 10 liters</p>	<p>You could keep the water going</p>	<p>You could use a wash cloth for hands & face</p>
<p>You could leave the tap on</p>	<p>You Save upto 15 liters</p>	<p>You could fill up a mug for shaving</p>	<p>You Save upto 70 liters</p>	<p>You could leave the shower on while you bathe</p>	<p>You could use the shower only when you need to rinse your body</p>
<p>You could let the tap run</p>	<p>You Save upto 10 liters</p>	<p>You could turn the tap off while brushing</p>	<p>You Save upto 1000 liters</p>	<p>You could ignore a leaking tap</p>	<p>You could promptly notify hotel staff</p>

This earth is the only home we have. Every little HELP to preserve it adds up to yet another beautiful morning for our children.

We share & appreciate your concern for environment preservation to save the Earth.
